

Weekly Tech tip: Open Source Statistics Software

GNU PSPP

[GNU PSPP](#) is a free open source alternative for SPSS (Proprietary Statistical Software), It provides similar functionalities to SPSS, and additionally has full support of open source generated and open-data file extensions such as Gnumeric, LibreOffice, and OpenOffice. It works smoothly with large datasets.

PSPP offers downloads for Windows installer, DMG files for MacOSX, and official installation packages for multiple Linux distributions like Debian, Ubuntu, Fedora, OpenSUSE and Gnewsense, It has also an official port for FreeBSD (Unix).
