Notes:

- ETS changes the Major Field Test (MFT) every three years; thus year-over-year comparison data is represented in three year increments.
- Source Data: represented over three year segments as the exam administered by ETS changes every three years.
ETS provides the resulting data in three year increments, so the data will mirror how the resulting data is presented to ENMU.
- Mean of ENMU Student Scores: the scale ranges from a low of 120 points to a high of 200 points.
- Summer 2002 data is included here for informational purposes but may not be reliable since the comparative data time frame could not be determined.
- The business sub-field, Information Systems, was not included in the Major Field Test until Spring, 2007. No data exists prior to this date.
- For the Comparative Percentile Ranking, the Institutional Data Report provided to ENMU by ETS for that corresponding testing period.
The scale for the percentile ranking begins at 0 and ends at the 100th percentile.
- Data results for the three year testing period between the years Sept. 2013 - June 2016 will fluctuate as more tests are administered during this testing period.
The Comparative Percentile Ranking will not be final until after this three year testing cycle is completed, at the end of 2016.
